

Quantum to the Continuum: Opportunities for Mesoscale Science

A Town Hall Meeting held by the Basic Energy Sciences
Advisory Committee of the US Department of Energy

Tuesday, March 27

9:00 – 11:00 a.m.

Room 6B, San Diego Convention Center

Light refreshments will be served

Hosted by John Sarrao, John Hemminger, and Doug Tobias, this meeting seeks input from energy scientists on research opportunities in new mesoscale phenomena and functionality, and facilities, instruments and tools needed to synthesize, characterize, and describe mesoscale materials, phenomena, and functionality. Your input will help shape future research directions in the Basic Energy Sciences that will be described in a report issued in Summer, 2012.

For more information, and to provide input, see:
